

Marion Technical Colleges offers two different levels of American Heart Association C.P.R., and basic First Aid. The two levels are:

Heartsaver CPR with AED

BLS (Basic Life Support) for Healthcare professionals

The Heartsaver course covers single rescuer adult, and child CPR with the use of an AED (automated external defibrillator). The infant module may be added if the class or individual needs this module. This class does come with a certification card. This course is suited for the layperson (non-medical).

The BLS for Healthcare Professionals course covers one and two rescuer CPR for adults, children and infants with the use of a pocket mask, a bag mask device and a defibrillator. This class is for Healthcare professionals.
